1	Page No 111, point c	The timeline for existing incidences at present repair and replacement of any/all components and products have to be completed within 150 days. Breakup of live and non- operational chargers	Requesting to provide the details of the operational and non-operational chargers as it would be easy for estimation. Without knowing the type of defect, it is difficult to commit for the given days	Clarification: Details of commissioned chargers along with commissioning date / operational date have been provided in list attached. This is based on the information / data available at the time of RfP publication. However, bidders are advised to carry out a detailed assessment of the EV chargers' condition (independent site survey / analysis, charger inspection, load availability/ load enhancement requirements, canopy structure repair/ replacement, advertisement potential or any/all other assessments, etc.) for respective package to ascertain the complete scope of work and execute the project in totality as per RfP terms and conditions. EESL/CESL shall extend necessary coordination and assistance to bidders.
2	General		Before quoting any rates, CPO's need to understand the expected investment to be done on all the sites which require us to conduct a site analysis, charger damage understanding, Load availability/ load enhancement requirements, Canopy Structure Repair/Replacement cost and any other expenses that might fall under the scope of Bidder. Request you to suggest a way to efficiently execute a joint survey with CPO and CESL Teams to analyse the operational status of the sites. *In case of utilization through the CPO APP/Platform what will be the payment process and timelines for the same?

All the necessary coordination with the concerned OEMs in this regard shall be facilitated by CESL for a smoother transition in matters related to OEM's products.	Component upgradation in the EV chargers should be allowed to the selected bidder.	Amended as: The successful bidder(s) shall undertake repair, replacement, and upgrading components of electric vehicle (EV) chargers through designated OEMs to whom LoA have been issued by EESL/CESL, during the warranty period. Also, successful bidder(s) must themselves coordinate with designated OEMs for any repairs, replacements, or upgrades of EV charger components covered under warranty. Alternatively, successful bidder (s) shall have an option to undertake repair, replacement, and upgrading components of electric vehicle (EV) chargers not covered under warranty either through designated OEMs or independently ensuring comparable or higher technical specifications, product compatibility and product performance without derating the capacity of the EV chargers. This is subject to approval or no-objection from designated OEMs, ensuring that the warranty from OEMs remains valid and all warranty clauses of the LOA should remain unaffected in accordance with the terms of the LoA issued by CESL/EESL. After the warranty period, the successful bidder(s) may choose to continue extended comprehensive on-site warranty and AMC services from the designated OEMs, provided that any extended warranty payments are made by the bidder(s) to EESL/CESL as stipulated in the LoA. Alternatively, the successful bidder(s) may opt to manage these services independently ensuring product performance and industry standards prevalent at that time. CESL will facilitate all necessary coordination with the relevant OEMs to ensure a smooth transition regarding the OEM's products. The successful bidder(s) must formally request approval from CESL in advance for any planned repair, replacement, modifications, or upgrades through OEMs other than the designated OEMs.

20	Section no -4. Page no. 113. Para no./Clause no - Technology Upgradation	Scenario A: Selected bidder(s) will be allowed to upgrade the existing Bharat DC-001 (15kW) and Bharat AC-001 (10kW) EV chargers to higher capacity advanced Fast Chargers subject to the condition that, then in such case selected bidder will have to pay the residual value or book value of such EV charger.	How CESL/EESL will calculate the depreciation year by year on the chargers for residual value or book value of the charger. Kindly clarify process of calculating the residual value	
21	Section no -4 PART-B, Page no. 113, Para no./Clause no - Technology upgrade	Scenario A: Selected bidder(s) will be allowed to upgrade the existing Bharat DC-001 (15kW) and Bharat AC-001 (10kW) EV chargers to higher capacity advanced Fast Chargers subject to the condition that, then in such case selected bidder will have to pay the residual value or book value of such EV chargers to CESL/EESL.	In case of chargers beyond repair, CPO will have to pay the residual value to CESL as per the RFP. In such cases, Can the CPO install new chargers with their preferred OEM Partners/Own Brand Chargers? Will the revenue share in this case be same as other scenarios?	Clarification: The selected bidder(s) will have the flexibility to install new EV chargers with their preferred OEM partners / own brand chargers subject to meeting all guidelines applicable for EV chargers including valid type test reports/certificate from ARAI/ICAT Labs and after obtaining approval by EESL/CESL. Please refer Section 10 of the RfP for revenue sharing mechanism in case of technology upgradation
